

Physician Disclosure

Dear Patient:

Ambulatory Surgical Centers (ASCs) are medical facilities that specialize in performing outpatient surgical procedures. ASCs play a pivotal role in moving services into less expensive yet clinically appropriate settings. ASC-qualified procedures can be considered more intensive than those done in the average doctor's office but not so intensive, as to require a hospital stay. Procedures performed in ASCs are broad in scope. In the United States today, more than 22 million surgeries a year are performed in more than 5,000 ASCs. Hoffman Estates Surgery Center is a multi-specialty ASC licensed by the Illinois Department of Public Health, certified by Medicare and accredited by AAAHC.

ASCs rarely have a single owner. Physician partners who perform surgeries in the center will often own at least some part of the facility. The ASC is seen as an extension of the physician's practice. Hoffman Estates Surgery Center has physician owners along with St. Alexius Medical Center.

Hoffman Estates Surgery Center takes great pride in being a physician-owned surgery center with the goal of making every patient visit a positive experience. Our physicians, Administrator, nurses, and healthcare professionals *are all actively involved in the operational decision-making* to ensure that you receive the utmost in quality care and personalized service.

We strive to maintain the highest standards for patient care. Anesthesia services are provided by Medical Center Anesthesia Group. Our Anesthesiologists also practice at St. Alexius Medical Center. Through the teamwork of our physicians and staff, the Hoffman Estates Surgery Center will do everything possible to make your surgical experience a positive one!

We look forward to exceeding your expectations and providing you with an outstanding surgical experience.

Sincerely,

The Physician Owners of Hoffman Estates Surgery Center
